

AHJO / KLAUS K HOTEL

VENUE

HELSINKI

FINLAND

The Klaus K Hotel has brought a distinctive element of stylish hotel accommodation to the Finnish capital. Not only does it represent Finland's first design hotel and an impressive extension of the city's hotel options but, located in the city centre, it has had the effect of adding another dimension to the city's restaurant and club circuit.

Three individually impressive restaurants (Toscanini, Filmitahti and Ilmatar) each serve distinctive food in equally distinctive surroundings whilst downstairs in the Klaus K's basement is Ahjo - the city's newest and most stylish club offering. The club retains the strong design theme of Finland's national poem, The Kevala, which has significantly influenced the look and feel of the hotel as a whole. Dark, brooding and effortlessly exclusive, Ahjo has found instant favour with Helsinki's trend setting young professional and business crowd.

The hotel's restaurant, bar and club areas have received an audio and lighting installation from DAS Audio's Finnish distributor - Electrowaves. As a result, each of the hotel's restaurant areas feature products from the Spanish audio manufacturer: 24 DAS Factor 8T+AX8s combine with DS108s to bring audio coverage to the Finnish cinema inspired Filmitahti whilst Toscanini includes DAS Factor 5T + AX5s. Processing and control come from Peavey.
