Fohhn takes digital development to the next level at ISE 2017

Show previews for German manufacturer's next generation loudspeakers and amplifiers

Nürtingen / Amsterdam, 18th January 2017 – At this year's Integrated Systems Europe (ISE) in Amsterdam, Fohhn Audio previews the latest technical updates to its Beam Steering loudspeakers and shows the most recent developments in its state-of-the-art digital amplifier technology (**Hall 7, Stand 7-H190**).

As part of an ongoing digital development strategy, Fohhn will introduce the next generation of its award-winning **Linea Focus** loudspeaker systems with **Beam Steering** capability. The latest models are to be equipped as standard with both digital AES/EBU- and Fohhn AIREA inputs. They will also be available with optional inputs for DANTE or Optocore – as well as analogue XLR inputs if required.

With Fohhn's brand new **DI-Series**, show visitors can take a closer look at the German manufacturer's latest developments in digital amplifier technology. These state-of-the-art, Class-D, DSP amplifiers will be equipped with the same analogue and digital input options as the Linea Focus loudspeaker models.

Visitors can also have a sneak preview of Fohhn's new **Media-Series** products, which are appearing for the very first time at ISE. Specially developed for use in combination with display screens and monitors, these new loudspeaker systems are ideal for video conferencing applications (over Skype for example), offering optimum levels of speech intelligibility to all participants. The new series will include both compact loudspeakers for media applications and variably adjustable systems that can be installed as sound bars.

Visit Fohhn Audio in Hall 7, Stand 7-H190.

About Fohhn

Fohhn Audio AG specialises in the manufacture of professional loudspeaker systems for both mobile and fixed-installation sound reinforcement. For over 20 years, the Nürtingen-based company has developed system concepts that combine innovative design, functionality and first class sound quality, with the aim of achieving perfect acoustic and optical integration. Development of all Fohhn systems takes place in-house in Nürtingen, Germany, incorporating the company's own highly developed DSP-, amplifier-, network- and remote control technology. Special focus is placed on the integration of state-of-the-art technologies such as Beam Steering and on the latest developments in 3-D audio and digital audio networking technology.

Fohhn is currently distributed in more than 30 countries. Fohhn customers and users include, among others, the Opéra Bastille and Charles de Gaulle airport in Paris, the University of Heidelberg, Mainz Cathedral, Hengdian Studios in China, the Shanghai Tower, Doonsan First Methodist Church in South Korea, the Danish Parliament, as well as the German, Kazakh and United Arab Emirates pavilions at EXPO 2015 in Milan.
