

Press Information – for immediate release

Fohhn showcases latest digital technology developments at Prolight & Sound ... And presents its complete product portfolio in a new “World of Fohhn” stand concept.

Nürtingen / Prolight & Sound, Frankfurt, 16th March 2017 – Fohhn Audio AG brings its next generation of Beam Steering systems and Class D amplifiers to this year’s Prolight & Sound, along with audio solutions from its upcoming Media-Series. These new products will feature in “The World of Fohhn”, (**Hall 3.1, Stand F81**), as part of a spectacular display involving the company’s entire product range: from the smallest adapter to the largest loudspeaker system. The Fohhn stand will include both new and established products, presented as “an exhibition within an exhibition”. Information on the company’s latest developments will be available to visitors via displays and media stations.

One of Fohhn’s show highlights is the digital updating of its award-winning **Linea Focus** products: This latest generation of Beam Steering systems is now equipped as standard with digital AES/EBU- and Fohhn AIREA inputs. The systems are also optionally available with digital inputs for DANTE and Optocore, as well as analogue inputs.

The same digital and analogue input options are also a feature of Fohhn’s brand new **DI-Series** amplifiers: These high performance DSP amps are notable for their extremely long peak hold and unique, contemporary front panel design.

A further highlight is the new **Media-Series**: Perfectly configured two-channel audio systems that can be seamlessly integrated into media stations for optimum speech intelligibility during web conferences and flawless reproduction of high quality media sound.

Fohhn looks forward to welcoming visitors to its new exhibition stand – F81 – in Hall 3.1.

About Fohhn

Fohhn Audio AG specialises in the manufacture of professional loudspeaker systems for both mobile and fixed-installation sound reinforcement. For over 20 years, the Nürtingen-based company has developed system concepts that combine innovative design, functionality and first class sound quality, with the aim of achieving perfect acoustic and optical integration. Development of all Fohhn systems takes place in-house in Nürtingen, Germany, incorporating the company’s own highly developed DSP-, amplifier-, network- and remote control technology. Special focus is placed on the integration of state-of-the-art technologies such as Beam Steering and on the latest developments in 3-D audio and digital audio networking technology.

Fohhn is currently distributed in more than 30 countries. Fohhn customers and users include, among others, the Opéra Bastille and Charles de Gaulle airport in Paris, the University of Heidelberg, Mainz Cathedral, Hengdian Studios in China, the Shanghai Tower, Doosan First Methodist Church in South Korea, the Danish Parliament, as well as the German, Kazakh and United Arab Emirates pavilions at EXPO 2015 in Milan.
