ASC and macom blend AV tech with tradition at Metzler Bank

Metzler Bank has turned to macom engineering company and Amptown System Company Frankfurt to create a contemporary working environment in its new Frankfurt office.

In the large bel étage conference room, ASC has set up a media wall with an integrated 90in Sharp LCD monitor and separate TV tuner, together with Fohhn AT-61 speakers behind a fabric screen. Beneath the monitor there is a Polycom videoconferencing system, while a wireless Crestron AirMedia 100 Gateway allows for BYOD into the existing network.

There are two seminar rooms on the second floor, each containing a media wall incorporating a concealable 70in Sharp LCD monitor with a separate TV tuner as well as Sonus speakers and amplifiers.

ASC also implemented three MediaCarts with integrated cable management for five additional conference rooms. A Samsung 65in LCD monitor with separate TV tuner was installed into each of these mobile system solutions.
