

Well equipped for any competition

Fohhn loudspeaker systems
in sports halls and stadia

Top-ranking speech intelligibility

Whether it's a case of important safety information, or simply a car being parked in the wrong place, announcements in sports halls and stadia need to be clearly heard and easily understood from every point in the venue. Loudspeakers that enable comprehensive coverage, as well as having the appropriate reach and directivity, are an important component of any well thought out voice alarm system. If these loudspeakers can also be used for general stadium sound reinforcement, e.g. during intervals, then it's even better.

Our loudspeakers lend themselves to sound reinforcement in all kinds of sporting venues – from football arenas through to velodromes and ice hockey stadia. On the following pages we present some examples of our many projects.

At the foot of the ski jump: weatherproof Arc-Series loudspeakers.

A big plus even at minus temperatures

Audi Arena (formerly Erdinger Arena),
Oberstdorf, Germany

Project

Nearfield coverage on spectator stands

Participating companies

Günther Akustik & Medientechnik

Fohhn systems installed

a number of Arc-Series AT-07
loudspeakers

A sound system for every season

Gazi-Stadion auf der Waldau,
Stuttgart, Germany

Project

Sound reinforcement system for the football
and American football stadium

Participating companies

MediasPro Medientechnik

Fohhn systems installed

a number of weatherproof Arc-Series AT-221w
and AT-661w loudspeakers

Football meets American football: home of the
Stuttgart Kickers and Stuttgart Scorpions.

Event proof and weatherproof

Frankenstadion, Heilbronn, Germany

Project

Sound reinforcement system for the football and athletics stadium

Participating companies

Siemens AG

Fohhn systems installed

a number of weatherproof Arc-Series AT-221w and AT-661w loudspeakers

Also ideal for open-air concerts: Pink and the Toten Hosen have already appeared at the Frankenstadion.

Outstanding performance for the champions

Motor Sich Sports Complex, Zaporizhia, Ukraine

After the conversion: the new home of HK Motor, Zaporizhia.

Fohhn's PT-70: Horn-loaded. Cardioid. Plug & Play.

Project

Sound reinforcement system for
the handball arena

Participating companies

Complex-V

Fohhn systems installed

a number of Perform-Series PT-70
full-range loudspeakers

Reinforcing the Bundesliga

Allianz Stadium, Vienna, Austria

Project

Stadium sound reinforcement and voice alarm systems (in accordance with UEFA standards)

Participating companies

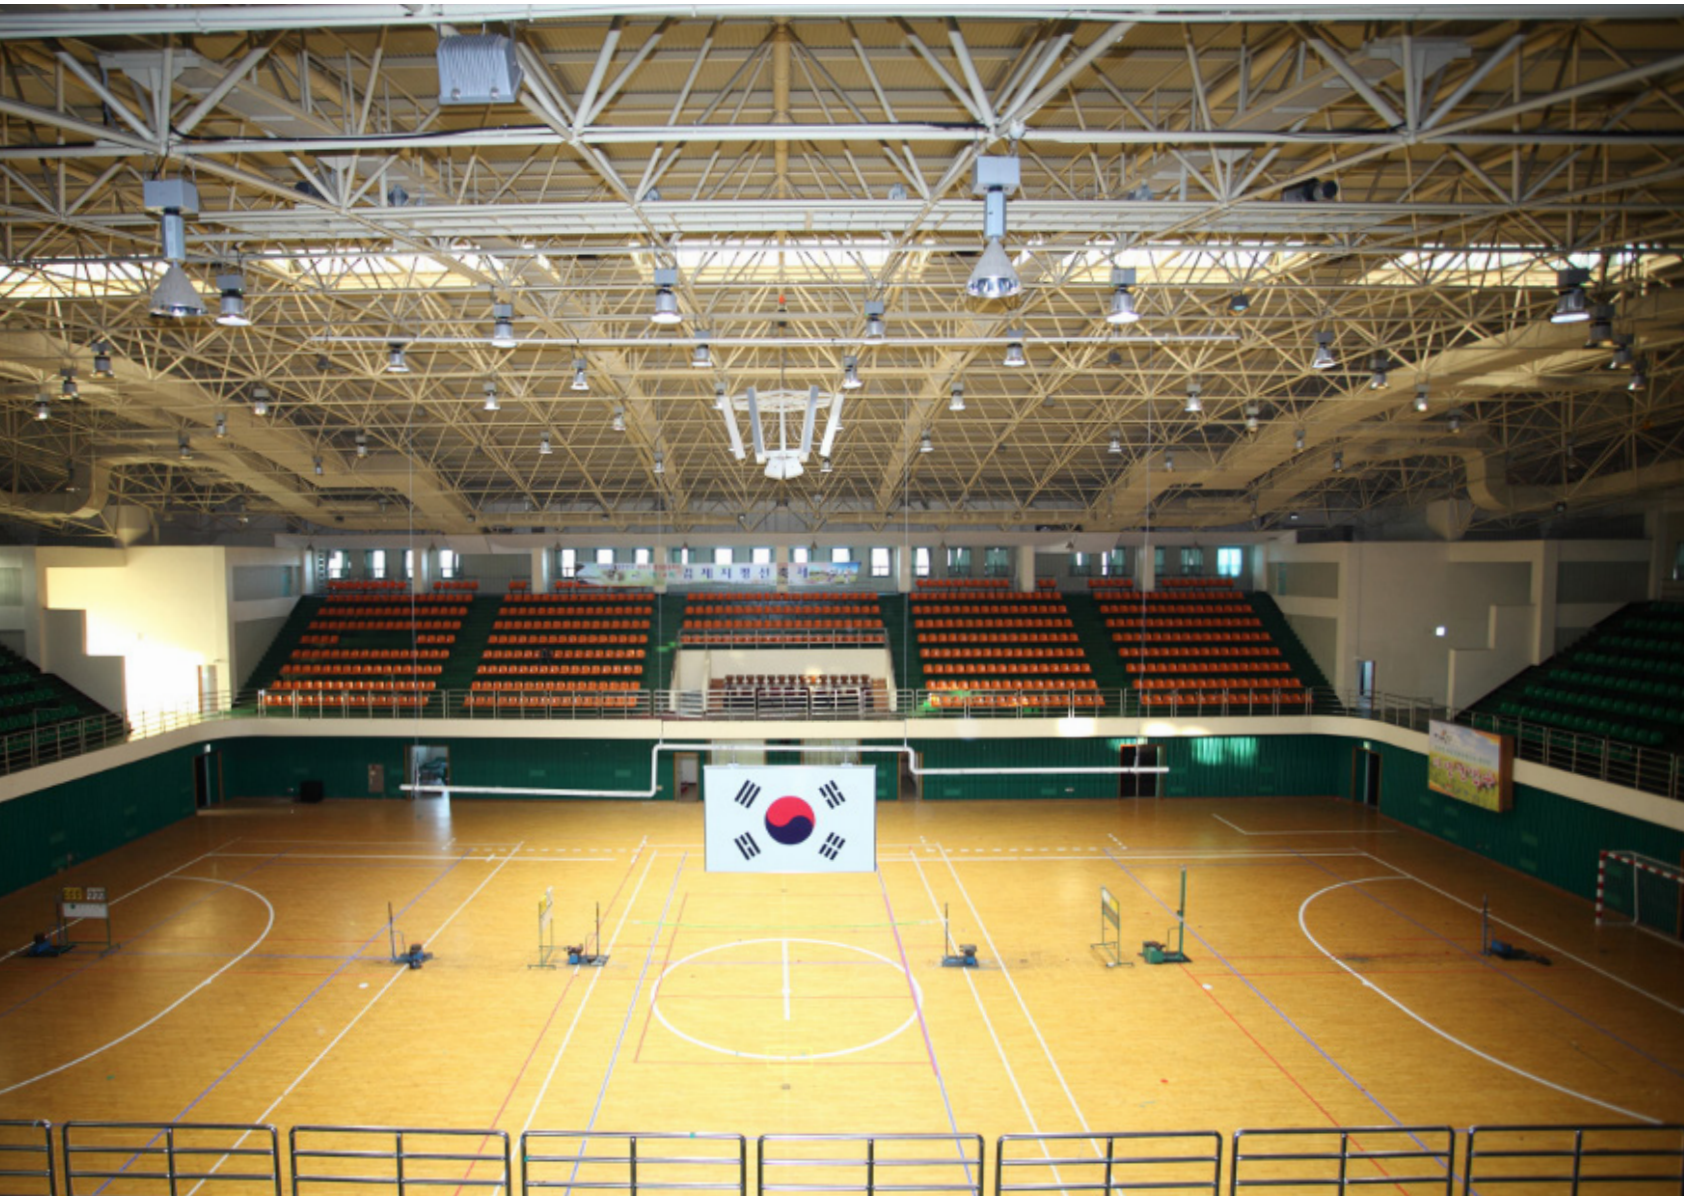

Honeywell Life Safety Austria GmbH
LSG Group

Fohhn systems installed

a number of weatherproof, passive,
Arc-Series outdoor loudspeakers

Space for 28,000 spectators:
the home of SK Rapid football club.

A central cluster on the hall ceiling consisting of six LX-600 systems:
optimal sound reinforcement for sportspeople and spectators.

Top sound – in the stands and on the pitch

Sports Hall, Gimje, South Korea

Project

Sound reinforcement system for the multipurpose sports hall

Participating companies

Stagenet Co. Ltd.

Fohhn systems installed

a cluster of six Linea LX-600 line source systems, an Xperience IV Power System (for mobile sound reinforcement)

Appropriate for figure skating and ballet on ice:
white Fohhn loudspeaker systems.

Crystal clear sound and speech reproduction

Mok-Dong Stadium, Seoul, South Korea

Project

Sound reinforcement system for the ice rink

Participating companies

Stagenet Co. Ltd.

Fohhn systems installed

a cluster of several Perform-Series loudspeakers,
a number of Arc AT-201 loudspeakers

Flexible choice of sound reinforcement zones using the FR-10 remote control module.

High levels of speech intelligibility: Linea Focus systems with Fohhn Beam Steering Technology.

Targeted sound reinforcement

Tissot Velodrome (formerly Velodrome Suisse),
Grenchen, Switzerland

Project

Sound reinforcement system for the multipurpose sports hall and velodrome

Participating companies

Sennheiser Schweiz AG
Habegger AG

Fohhn systems installed

10 Linea Focus LFI-120 line source systems

High performance versus high noise levels

Stadion Letzigrund, Zürich, Switzerland

Project

Sound reinforcement for the outdoor areas
of the football and athletics stadium

Participating companies

avidec AG

Fohhn systems installed

a number of passive Arc-Series loudspeaker
systems

Fit for UEFA Euro 2008: the home to football clubs FC Zürich and Zürich Grasshoppers.

On the final straight

Sha Tin Racecourse, Hong Kong, China

Project

Sound reinforcement for spectator stands
in the parade ring

Participating companies

Shoushan System Integration Ltd.

Fohhn systems installed

29 Linea LX-100 line source systems

Linea line source systems in a special colour:
flawless transmission of announcements and commentaries.

FOHNN.
SOUNDS PERFECT.
IS PERFECT.
