Free Stand III

The new Fohhn® Free Stand designer stands have been developed specially for the design speakers and allow the user to arrange different LINEA and Arc speaker systems perfectly around the room.

Description

The new Fohhn® Free Stand designer stands have been developed specially for the design speakers and allow the user to arrange different LINEA and Arc speaker systems perfectly around the room.

The stands and speakers combine harmoniously to form the perfect unit. Free Stand designer stands are a top-quality solution for complex room layouts where wall or ceiling installations are not possible. Free Stand designer stands are manufactured exclusively in Germany and can be adapted to individual customer requirements

Different applications

Free Stand designer stands are ideal for churches, museums, castles, conference rooms, hotels and many other venues where the installation of speakers on walls or ceilings is not possible and great importance is attached to a harmonious, discreet design.

Overview of advantages

- harmonious, discreet design
- speakers arranged perfectly around the room
- ideal for historical venues where wall installation is not possible
- heavy round steel base with rubber feet for maximum stability
- obscured cable guide in the stand and round base
- top-quality materials
- option of adapting to specific customer requirements
- option of anchoring the round base securely to the floor
- (safety installation)
- outstanding quality „Made in Germany“
